

Declaration of exposure to partial results

Please download this document (File → Download), fill it in, sign it, and return it by email together with your deposit DOI(s), at the latest by the prediction lock on **August 31, 2026**.

While the human megastudy was still collecting data, preliminary results were presented at three academic talks, all disclosed in the benchmark preregistration:

1. **A five-minute talk at a closed academic workshop, Max Planck Institute for Human Development, Berlin (May 2026).** Shown: the prediction fit of the two public v1 clone datasets against preliminary human ATEs (scatter plots with fitted lines and correlations, human sample at the time $N \approx 3,500$ of the planned 22,000) and control-condition response densities of humans and clones for a few outcomes.
2. **An invited talk on preliminary human megastudy results, Max Planck Institute for Human Development, Berlin (May 2026, N at the time $\approx 3,000$).**
3. **A conference talk on preliminary human megastudy results, University of Hohenheim (June 2026, N at the time $\approx 13,000$).**

Every team must declare whether any member was exposed to partial results of the human megastudy, through these talks or any other channel, including secondhand accounts. **A "yes" does not invalidate your submission.** Exposed teams' entries stay in the benchmark and in all main analyses. We additionally run robustness checks that exclude them, which is why exposure must be known to us. This declaration complements the blinding attestation of the registration form (item I.3).

Team ID (sent to you via email): team_06

(Please check only one):

☒ **No exposure.** No member of the team attended any of the talks listed above, and no member has seen, heard, or received partial results of the human megastudy through any other channel (slides, notes, numbers, verbal accounts) before the prediction lock.

☐ **Exposure, described below.** One or more members were exposed to partial results:

Member name	Channel (talk 1 / 2 / 3 or other)	Comment (<i>optional</i>)

I sign on behalf of all team members and confirm that this declaration is accurate.
